

Dear Sirs: I respectfully request that you reject the NAB's petition #04-160 and let XM radio have the right to broadcast what the people want. Competition is what made this country great and to stifle it would be UN American. I listen to XM radio every day and get far more from it than most of my local stations. I am on the road as a service technician and I can get it anywhere unlike my local stations. Please reject this petition. Thank you.
